**NOTICE TO MEMBERS**

With this letter the Board of Directors of The Cecilia Water Corporation wishes to inform our customers of the future of our water system. The continued growth of our community has made it necessary for expansion of our current water system. In order to keep up with the growth and demand on the system, the Board has concluded that a rate increase is necessary. The Board's conclusion, along with the recommendation of the Louisiana Rural Water Association's rate analysis was approved by the USDA. A new water treatment plant has been in the making for several years. We are pleased to announce that the plans are in the final phase and will be released for bid in the weeks ahead. Other projects are being completed at the existing water treatment plant. The added cost of production of water and maintenance of our system is another factor in the Board's decision to increase the rates. The Board has strived over the years to keep rates as low as possible. The last rate increase was in January of 2013. The new rate increase will be implemented on your May 2018 bill.

The following is the new rate structure:

**Residential:**

**From:** \$11.00 base rate which includes the first 2,000 gallons per month and \$4.50 per 1,000 gallons thereafter.

**To:** \$15.00 base rate which includes the first 2,000 gallons per month and \$4.75 per 1,000 gallons thereafter.

**Commercial:**

**From:** All base rates remain the same and \$4.50 per 1,000 gallons thereafter.

**To:** All base rates remain the same and \$4.75 per 1,000 gallons thereafter.

Sincerely,

Neal Kennison, President
